MHA Launches Healthcare Speakers' Bureau

BURLINGTON – February 14, 2018 - Healthcare is the number one public policy issue today. For hospitals and other healthcare organizations, staying current and in-step with innovation is key to success. As an industry leader, the Massachusetts Health & Hospital Association (MHA) has simplified the often overwhelming process of identifying and securing the nation's top healthcare leaders with the launch of [H Speakers](#). Unlike other speaker's bureaus that represent a wide variety of topics, H Speakers works exclusively within healthcare to offer experts on the most important and relevant topics. Our speakers educate, enlighten, and inspire employees, community leaders, and board members across healthcare.

“As a top provider of healthcare education for many years, MHA is in a unique position to provide some of the best presenters in healthcare today,” said MHA President and CEO, Steve Walsh. “H Speakers leverages our extensive expertise to help healthcare organizations and other stakeholders develop high-quality, relevant programs for their boards, caregivers, leadership, and staff members. Our carefully selected speakers have the knowledge to support and enable these organizations to stay agile and effective as they fulfill their missions and deliver high quality, cost-efficient patient care.”

Drawing from a selection of top speakers with deep expertise on critical topics in healthcare today, [H Speakers](#) simplifies the search process for an organization to guarantee their next board retreat, leadership program, conference, or workshop will be a success.

H Speakers expert presenters can teach or facilitate sessions at destinations across the country. Organizations looking for event space can also contact MHA about the association's state-of-the-art conference center at its headquarters in Burlington, MA, just 15 miles outside of Boston.

As healthcare in the United States continues its rapid transformation, one key to success will involve developing the strongest leaders and workforce. [H Speakers](#) can bring vital expertise directly to organizations, providing the best information and training possible at a fraction of the cost of sending individuals out to programs.
